## Data in Many Forms...

Statistics Canada disseminates data in a variety of forms. In addition to publications, both standard and special tabulations are offered on computer print-outs, microfiche and microfilm, and magnetic tapes. Maps and other geographic reference materials are available for some types of data. Direct access to aggregated information is possible through CANSIM, Statistics Canada's machine-readable data base and retrieval system.

## How to Obtain More Information

Inquiries about this publication and related statistics or services should be directed to:

Monthly Measures Section,  
Industry Measures and Analysis Division,

Statistics Canada, Ottawa, K1A 0T6 (Telephone: 990-9145) or to the Statistics Canada reference centre in:

St. John's	(772-4073)	Sturgeon Falls	(753-4888)
Halifax	(426-5331)	Winnipeg	(949-4020)
Montréal	(283-5725)	Regina	(359-5405)
Ottawa	(990-8116)	Edmonton	(420-3027)
Toronto	(973-6586)	Vancouver	(666-3691)

Toll-free access is provided in all provinces and territories, for users who reside outside the local dialing area of any of the regional reference centres.

Newfoundland and Labrador	Zenith 0-7037
Nova Scotia, New Brunswick and Prince Edward Island	1-800-565-7192
Quebec	1-800-361-2831
Ontario	1-800-268-1151
Manitoba	1-800-282-8006
Saskatchewan	1 (112)800-667-3524
Alberta	1-800-222-6400
British Columbia (South and Central)	112-800-663-1551
Yukon and Northern B.C. (area served by NorthwTel Inc.)	Zenith 0-8913
Northwest Territories (area served by NorthwTel Inc.)	Call collect 420-2011

## How to Order Publications

This and other Statistics Canada publications may be purchased from local authorized agents and other community bookstores, through the local Statistics Canada offices, or by mail order to Publication Sales, Statistics Canada, Ottawa, K1A 0T6.  
1-(613) 993-7276

Toronto  
Credit Card only (973-8018)

## Des données sous plusieurs formes...

Statistique Canada diffuse les données sous formes diverses. Outre les publications, des totalisations habituelles et spéciales sont offertes sur imprimés d'ordinateur, sur microfiches et microfilms et sur bandes magnétiques. Des cartes et d'autres documents de référence géographiques sont disponibles pour certaines sortes de données. L'accès direct à des données agrégées est possible par le truchement de CANSIM, la base de données ordinolingué et le système d'extraction de Statistique Canada.

## Comment obtenir d'autres renseignements

Toutes demandes de renseignements au sujet de cette publication ou de statistiques et services connexes doivent être adressées à:

Section des mesures mensuelles,  
Division des mesures et de l'analyse des industries,

Statistique Canada, Ottawa, K1A 0T6 (téléphone: 990-9145) ou au centre de consultation de Statistique Canada à:

St. John's	(772-4073)	Sturgeon Falls	(753-4888)
Halifax	(426-5331)	Winnipeg	(949-4020)
Montréal	(283-5725)	Regina	(359-5405)
Ottawa	(990-8116)	Edmonton	(420-3027)
Toronto	(966-6586)	Vancouver	(666-3691)

Un service d'appel interurbain sans frais est offert, dans toutes les provinces et dans les territoires, aux utilisateurs qui habitent à l'extérieur des zones de communication locale des centres régionaux de consultation:

Terre-Neuve et Labrador	Zénith 0-7037
Nouvelle-Écosse, Nouveau-Brunswick et Île-du-Prince-Édouard	1-800-565-7192
Québec	1-800-361-2831
Ontario	1-800-268-1151
Manitoba	1-800-282-8006
Saskatchewan	1 (112)800-667-3524
Alberta	1-800-222-6400
Colombie-Britannique (sud et centrale)	112-800-663-1551
Yukon et nord de la C.-B. (territoire desservi par la NorthwTel Inc.)	Zénith 0-8913
Territoires du Nord-Ouest (territoire desservi par la NorthwTel Inc.)	Appelez à frais virés au 420-2011

## Comment commander les publications

On peut se procurer cette publication et les autres publications de Statistique Canada auprès des agents autorisés et des autres librairies locales, par l'entremise des bureaux locaux de Statistique Canada, ou en écrivant à la Section des ventes des publications, Statistique Canada, Ottawa, K1A 0T6.

## Symbols

The following standard symbols are used in Statistics Canada publications:

- .. figures not available.
- nil or zero.
- amount too small to be expressed.

### Note

Annual averages of seasonally adjusted data are identical to annual levels except for minor variations which are due to rounding.

### Codes

SNA Industry Code: a System of National Accounts industry codes appearing in the tables should be interpreted as follows:

An S code corresponds more or less to a division code from the Standard Industrial Classification, broken down between the business and non-business sectors of the economy. For the business sector, the industry code goes from S01 to S13 and, for the non-business sector, it goes from S17 to S25.

An M code corresponds to a major group within a division.

An L code corresponds to the lowest level at which estimates of GDP for an industry or a group of industries can be linked across various industrial classifications.

Finally a W code corresponds to the most detailed level at which estimates of GDP by industry are prepared using a given SIC.

### A Note on CANSIM®

All tabular data appearing in this publication, as well as many other data series, are available to the public from CANSIM via terminal, on computer printouts, or in machine readable form.

For further information write to CANSIM, Statistics Canada, Ottawa, K1A 0T6, or call (613)990-8200.

## Signes conventionnels

Les signes conventionnels suivants sont employés uniformément dans les publications de Statistique Canada:

- .. nombres indisponibles.
- néant ou zéro.
- nombre infimes.

### Nota

La moyenne annuelle désaisonnalisée est identique au niveau annuel sauf pour des différences mineurs dues à l'arrondissement.

### Codes

Codes des industries du SCN: le code des industries du Système de la comptabilité nationale figurant aux tableaux doit être interprété ainsi:

Un code S correspond plus ou moins au code d'une division de la classification type des industries, ventilée entre le secteur des entreprises et le secteur non commercial. Pour le secteur des entreprises, le code des industries va de S01 à S13 et, pour le secteur non commercial, il va de S17 à S25.

Un code M correspond au grand groupe à l'intérieur d'une division.

Un code L correspond au niveau le plus bas auquel les estimations du PIB pour une industrie ou un groupe d'industries peuvent être raccordées à travers diverses classifications d'industries.

Enfin, un code W représente le niveau le plus détaillé auquel les estimations du PIB par industrie sont préparées en utilisant une CTI donnée.

### Note au sujet de CANSIM®

Toutes les données présentées dans cette publication et beaucoup d'autres données contenues dans le CANSIM peuvent être extraites par l'intermédiaire d'un terminal, sous forme d'imprimés d'ordinateur ou sous une forme lisible par la machine.

Pour plus de renseignement, écrivez à CANSIM, Statistique Canada, Ottawa, K1A 0T6, ou téléphonez à (613)990-8200.

## THE SYSTEM OF NATIONAL ACCOUNTS

In Canada, the National Accounts have been developed since the close of the Second World War in a series of publications relating to their constituent parts. These have now reached a stage of evolution where they can be termed a "System of National Accounts". For purposes of identification, all publications (containing tables of statistics, descriptions of conceptual frameworks and descriptions of sources and methods) which make up this System carry the term "System of National Accounts" as a general title.

The System of National Accounts in Canada consists of several parts. The annual and quarterly Income and Expenditure Accounts (included with Catalogue Nos. carrying the prefix 13) were, historically speaking, the first set of statistics to be referred to with the title "National Accounts" (National Accounts, Income and Expenditure). The Balance of International Payments data (Catalogue Nos. with prefix 67), are also part of the System of National Accounts and they, in fact, predate the Income and Expenditure Accounts.

Greatly expanded structural detail on industries and on goods and on services is portrayed in the Input-Output Tables of the System (Catalogue Nos. with prefix 15). The Catalogue Nos. carrying the prefix 15 also provide measures of the contribution of each industry to Gross Domestic Product at factor cost as well as Productivity Measures.

Both the Input-Output Tables and estimates of Gross Domestic Product by Industry use the establishment as the primary unit of industrial production. Measures of financial transactions are provided by the Financial Flow Accounts (Catalogue Nos. with prefix 13). Types of lenders and financial instruments are the primary detail in these statistics and the legal entity is the main unit of classification of transactors. Balance sheets of outstanding assets and liabilities are published annually.

The System of National Accounts provides an overall conceptually integrated framework in which the various parts can be considered as interrelated sub-systems. At present, direct comparisons amongst those parts which use the establishment as the basic unit and those which use the legal entity can be carried out only at highly aggregated levels of data. However, Statistics Canada is continuing research on enterprise-company-establishment relationships; it may eventually be feasible to reclassify the data which are on one basis (say the establishment basis) to correspond to the units employed on another (the company or the enterprise basis).

In its broad outline, the Canadian System of National Accounts bears a close relationship to the international standard as described in the United Nations publication: *A System of National Accounts* (Studies in Methods. Series F, No. 2 Rev. 3, Statistical Office, Department of Economic and Social Affairs, United Nations, New York 1968).

## LE SYSTÈME DE COMPTABILITÉ NATIONALE

Au Canada, les comptes nationaux ont fait l'objet depuis la fin de la Seconde Guerre mondiale de toute une série de publications portant sur leurs éléments constitutifs. Ils ont connu une telle évolution qu'on peut maintenant les qualifier de "Système de comptabilité nationale". Aux fins d'identification, toutes les publications qui font partie du système (elles contiennent des tableaux statistiques, la description du cadre théorique et l'explication des sources et des méthodes) porteront le titre général de "Système de comptabilité nationale".

Le système de comptabilité nationale du Canada se divise en plusieurs catégories de comptes. Les comptes annuels et trimestriels des revenus et des dépenses (paraissant dans les publications dont le numéro de catalogue commence par 13) ont constitué le premier ensemble de statistiques à être connu sous le titre de "Comptes nationaux" (Comptes nationaux, revenus et dépenses). Les données sur la balance canadienne des paiements internationaux (numéro de catalogue commençant par 67) font également partie du système de comptabilité nationale; elles ont même existé avant les comptes des revenus et des dépenses.

Une nomenclature beaucoup plus détaillée d'industries et de biens et services figure dans les tableaux d'entrées-sorties du système (numéro de catalogue commençant par 15). Les publications dont les numéros de catalogue commencent par 15 comprennent aussi les mesures de l'apport de chaque branche d'activité au total du produit intérieur brut au coût des facteurs ainsi que les mesures de productivité.

L'établissement est l'unité primaire de production industrielle tant dans les tableaux d'entrées-sorties que dans les estimations du produit intérieur brut. Les comptes de flux financiers (publications dont les numéros de catalogue commencent par 13) mesurent les opérations financières. Les catégories de prêteurs et d'instruments financiers forment les éléments de base de ces statistiques et la personne morale est le point de départ du classement des agents économiques. Les comptes du bilan des actifs et passifs en circulation sont disponibles annuellement.

Le système de comptabilité nationale constitue un ensemble conceptuellement intégré dans lequel les diverses catégories de comptes peuvent être considérées comme des sous-systèmes étroitement liés entre eux. Au stade actuel de développement, on ne peut faire de comparaison directe entre les éléments basés sur l'établissement ceux qui sont basés sur l'entité juridique que lorsque les données sont groupées dans des catégories très générales. Toutefois, Statistique Canada poursuit ses recherches sur les relations entre l'entreprise, la société et l'établissement. Il sera peut-être possible un jour de reclasser les données établies sur une certaine base (l'établissement par exemple) de manière à les faire correspondre aux données établies sur une autre base (société ou entreprise).

Dans ses grandes lignes, le système de comptabilité nationale du Canada suit de très près la norme internationale exposée dans la publication des Nations Unies intitulée *Système de comptabilité nationale* (Études méthodologiques, série F, No. 2, rév. 3 Bureau de statistique, Département des affaires économiques et sociales, Nations Unies, New York, 1970).

# Historical Revision of Monthly Estimates of GDP at Factor Cost, By Industry

## Introduction

This report presents historically revised monthly estimates of Gross Domestic Product (GDP) at factor cost, by industry, in 1981 prices, for the period January 1961 to December 1980. Since the quarterly estimates of GDP by industry are derived from the monthly estimates, the revision to the monthly data necessarily implies a revision to the quarterly figures, which are also presented in this report. The monthly (and therefore the quarterly) figures have been adjusted to be consistent with annual benchmark estimates of value added compiled by the Input-Output Division of Statistics Canada. These annual estimates are also presented in this report and are available as well from the Input-Output Division.

This revision of GDP by industry is part of the historical revision of the System of National Accounts. The major changes introduced to the monthly estimates by this revision include: greater statistical integration with other components of the System of National Accounts; uniform use of a new Industrial Classification system; and use of the annual benchmarks of value added produced by Input-Output Division. The estimates are linked with the 1981 priced data introduced last September, and are expressed in 1981 prices.

The following sections provide commentary on the major changes occasioned by the historical revision, and in addition provide background information that: summarizes the sources and methods used in compiling the monthly estimates; provides an evaluation of the quality of the estimates by industry; and indicates the availability of annual updates to the estimates, to the description of methods and sources, and to the evaluation of quality of the estimates.

# Révisions historiques des estimations mensuelles du PIB par industrie au coût des facteurs

## Introduction

Ce rapport présente les données historiques et révisées – raccordées à celles publiées en septembre dernier – portant sur les estimations mensuelles, trimestrielles et annuelles du produit intérieur brut (PIB) par industrie au coût des facteurs aux prix de 1981 pour la période de 1961 à 1980. Les données infra-annuelles ont fait l'objet d'un ajustement aux points repères annuels de la valeur ajoutée préparés par la Division des entrées-sorties de Statistique Canada. Toutes les estimations annuelles du PIB par industrie aux prix courants et aux prix de 1981 sont disponibles auprès de la Division des entrées-sorties.

Cette révision historique du PIB mensuel par industrie s'insère dans le processus de révision des diverses composantes du système de la comptabilité nationale. Elle résulte de l'intégration statistique de l'ensemble du système canadien de la comptabilité nationale, de l'emploi d'un système uniforme de classification des industries et de l'utilisation des mesures annuelles du PIB préparées à partir des comptes des entrées-sorties comme points de repère pour les estimations mensuelles.

On présente les modifications majeures découlant de la révision historique en plus d'éléments d'information sur les estimations mensuelles du PIB par industrie: c'est-à-dire les sources et méthodes utilisées pour leur calcul, une évaluation de leur qualité ainsi qu'un commentaire au sujet de la mise à jour annuelle des estimations, de la description des sources et méthodes de même que de l'évaluation de la qualité des estimations.

## I. Major Revisions to the Annual Benchmarks

It is worth describing briefly the connection between the subannual estimates and the annual benchmarks provided by Input-Output Division. The annual benchmarks are typically based on more complete information than are the initial subannual estimates. For the tobacco industry, for example, the annual benchmarks are compiled using information from the annual census of manufacturers, whereas the subannual estimates draw upon the monthly production survey of tobacco producers. As a result, without adjustment the monthly figures will not sum to the annual benchmarks. The more complete annual information is incorporated into the monthly estimates by a technique called step adjustment. This technique adjusts the monthly data so that it sums to the annual benchmarks, thus incorporating the year-to-year movement provided by the annual data. At the same time it preserves as much of the within year movement inherent in the unadjusted monthly data as possible.

Much of this revision to the monthly estimates is due to revisions to the annual benchmarks. Previously, benchmark estimates were prepared by the Industry Measures and Analysis Division independently of the estimates that resulted as a by-product of the Input-Output Tables. As part of the ongoing process of integration within the system of National Accounts, the Input-Output Division is now responsible for preparation of unique annual benchmarks of GDP. Some of the revision to the benchmarks is due to the difference between the Input-Output estimates and those previously prepared by the Industry Measures and Analysis Division. In addition to these global differences, industry specific changes were introduced in the treatment of construction and of wholesale and retail trade.

Construction output is now measured on an activity basis rather than an industry basis. That is, virtually all construction on own account by establishments classified to industries other than construction is now included in the estimate of output for the construction industry, and is excluded from output of those industries.

## I. Modifications importantes aux estimations annuelles

Examinons brièvement la relation entre les estimations infra-annuelles et les points repères annuels. Le PIB annuel par industrie aux prix de 1981 provient des tableaux entrées-sorties. Les informations provenant des recensements des entreprises et de plusieurs autres sources disponibles sont utilisées pour préparer les estimations annuelles. Côté mensuel, on calcule un indicateur mensuel à partir d'une enquête ou d'informations spécifiques à une industrie, un groupe d'industries ou sur des biens ou services produits ou vendus dans le pays; ainsi, les données compilées à partir de l'enquête sur la production des produits du tabac servent comme indicateur mensuel de la production pour l'industrie du tabac. La Division des entrées-sorties utilise les résultats du recensement annuel des manufacturiers pour cette même industrie. La somme annuelle des résultats de l'indicateur mensuel diffère du PIB annuel pour cette industrie si on n'introduit pas un ajustement. La technique de l'étalonnage des données mensuelles aux estimations annuelles permet d'incorporer dans les estimations mensuelles la variation annuelle compilée à partir des mesures annuelles plus exhaustives; l'étalonnage consiste à ajuster les données mensuelles de telle sorte que leur somme annuelle est identique aux points repères annuels, tout en minimisant toute distortion aux variations de mois à mois inhérentes aux données mensuelles.

Les révisions aux estimations mensuelles du PIB présentées ici résultent surtout de révisions des points repères annuels. Les estimations de ces derniers étaient auparavant préparées indépendamment par la Division des mesures et de l'analyse des industries et différaient quelque peu de celles compilées dans les tableaux d'entrées-sorties. L'intégration du système de la comptabilité nationale résulte ici en une préparation unique des points repères annuels du PIB à Statistique Canada par la Division des entrées-sorties. Des modifications spécifiques dans la préparation des estimations pour l'industrie de la construction, le commerce de gros et le commerce de détail expliquent les autres révisions.

Les estimations de la production pour la construction couvrent maintenant non seulement l'industrie mais l'ensemble des activités du bâtiment et des travaux publics: les données pour tous les travaux de construction faits à propre compte rapportées par les établissements non classifiés à l'industrie de la construction sont

Previously, construction output did not include all such own account work. Another change relates to certain alterations and repairs, which are now considered to be part of the output of that industry. This change in the treatment of repair expenditures increased the estimate of net rent in the finance and real estate industries, and raised the estimate of output in residential construction.

Within wholesale and retail trade, annual benchmarks on output by store type are not available from the Input-Output system. Consequently, monthly estimates of output by store type are no longer available due to the integration of the monthly estimates with annual benchmarks provided by Input-Output Division. Output estimates for total retail trade and for total wholesale trade continue to be available on a monthly and annual basis. Users wishing information at a store type level are urged to contact Industry Division.

## II. Classification of Industries

Two major changes concerning the definition and classification of industries have been introduced with this historical revision. The new System of National Accounts Industry Codes has been introduced providing continuity across data compiled according to the 1960 and 1970 and 1980 SICs. Also, the treatment of the business and non-business sectors has been changed.

### (a) The System of National Accounts Industry Codes

Development of a new SIC always entails a tradeoff between trying to reflect the current industrial structure, yet maintaining enough similarities with the past in order to provide continuity of industry definitions. Because it is a tradeoff, the SIC cannot completely achieve either of its goals. As a complement to the 1960, 1970 and 1980 SICs, the System of National Accounts has developed a system of industry codes that defines industries in a way that provides basically continuous time series from 1961 to date.

déduites du rapport de ces établissements et attribuées à l'industrie de la construction. Auparavant, ces estimations faisaient partie du PIB mais pour plusieurs des industries qui rapportaient des données sur les travaux de construction faits à propre compte. L'apport de données non prises en compte antérieurement au titre de l'amélioration et de la réparation des logements a amené une révision de la construction domiciliaire tout en affectant à la hausse celles des loyers nets dans les industries de la finance et des affaires immobilières.

Quant au commerce de gros et de détail, il n'est pas possible de calculer à partir des tableaux d'entrées-sorties le PIB annuel par type de commerce; on prépare les estimations mensuelles du PIB seulement pour l'ensemble du commerce de gros et pour celui du commerce de détail. Pour obtenir des informations plus détaillées par type de commerce, les utilisateurs sont donc priés de consulter la Division des industries.

## II. Classification des industries

Avec cette révision historique des estimations mensuelles du PIB, nous introduisons deux changements importants à la définition et à la classification des industries: nous utilisons dorénavant les codes des industries du système de la comptabilité nationale et nous modifions la préparation des estimations par industrie par secteur.

### a) Classifications des industries et codes des industries du système de la comptabilité nationale

Parce qu'elle entraîne toujours un choix difficile entre la capacité de refléter la structure industrielle actuelle et celle de conserver assez de similitudes avec le passé en vue de préserver une continuité des définitions des industries, l'utilisation d'une nouvelle classification type des industries comme celle de 1980 ne peut combler entièrement et conjointement ces deux buts. Le système de la comptabilité nationale a développé une nouvelle codification des industries qui permet la préparation de séries chronologiques continues à partir de 1961 en complément aux trois classifications des industries – 1960, 1970 et 1980. Voyons comment cette codification fonctionne.

Codes for worksheet level (W) industries were created for each of the 1960, 1970 and 1980 SICs. The worksheet level is the lowest level of aggregation at which annual estimates of value added are prepared. The worksheet level could be a four-digit industry such as Poultry Products (Industry 1012 in both the 1970 and 1980 SICs), a three-digit industry such as motor vehicle manufacturers (323 in 1970 and 1980 SICs), or a two-digit industry such as Services Incidental to Mining (Major Group 05, 1970 SIC, and Major Group 09, 1980 SIC).

A link level (L) was defined as the lowest level that provides a common definition of industries across all three versions of the SIC, and that provides continuity in time series accordingly compiled. Higher level aggregations were also defined. The M level corresponds more or less to Major Groups as defined by the various SICs, while the S level corresponds to Industrial Divisions such as manufacturing. Special aggregations such as Industrial Production, Durable and Non-durable Manufacturing, etc., were also defined and are referred to as the G level of aggregation. All series at the S, M, and G levels are calculated as aggregates of L level series and therefore satisfy the requirement for continuity.

The notion of continuity was operationalized using certain quantitative criteria. Changing from one SIC to another implies re-classifying establishments from one industry to another. If, over a given reference period, the value added for a specific industry changed too much on account of this reclassification of establishments, the value added series for that industry was not considered to be a continuous time series. Near equality of value added over the reference period, however, was not a sufficient criterion. The value added of incoming establishments could be large and nearly equal to the value added of outgoing establishments. In this case the composition of the industry would have changed substantially while total value

added was not. On définit les codes de travail (W) en termes de chacune des trois classifications types des industries. Les utilisateurs peuvent se référer à l'appendice portant sur les "Codes des industries selon le SCN" à la fin de cette publication. Un code de travail (W) indique à l'utilisateur le niveau le plus désagrégé auquel est préparée l'estimation annuelle du PIB pour une industrie. Il peut correspondre à un code d'industrie à quatre chiffres, comme pour l'industrie de la volaille (CAÉ 1970:1012, CTI 1980:1012), ou un code d'industrie à trois chiffres comme pour l'industrie des fabricants de véhicules automobiles (CAÉ 1970:323, CTI 1980:323), ou un code à deux chiffres (qui correspond au groupe d'industries), comme les services miniers (CAÉ 1970: mines groupe 05, CTI 1980: grand groupe 09).

Les codes d'industrie au niveau L représentent les industries classifiées au niveau le plus désagrégé pour lesquelles il existe une nomenclature commune des activités économiques et les données font l'objet d'une continuité chronologique entre les trois classifications types d'industries. On a aussi défini des niveaux d'agrégation plus élevés qui font l'objet d'une continuité chronologique. Les estimations présentées au niveau M correspondent plus ou moins à celles des grands groupes définis dans les diverses classifications d'industries. Finalement, les estimations au niveau S se rapportent aux divisions des industries, comme les industries manufacturières et les agrégats au niveau G comprennent notamment la production industrielle, l'ensemble de l'économie et les industries manufacturières de biens durables. Les mesures de valeur ajoutée présentées aux niveaux M, S et G sont calculées par l'addition des estimations du PIB de chaque industrie composante au niveau L et, par conséquent, font l'objet de continuité.

La notion de continuité s'est appliquée en utilisant certains critères quantitatifs. Le changement d'une classification type à une autre implique la reclassification des établissements d'une industrie à une autre. Si, pour une période de référence donnée, la valeur ajoutée d'une industrie bien précise varie beaucoup à cause de la reclassification des établissements attribuable à l'introduction d'une nouvelle classification type des industries, celle-ci ne peut donc pas faire l'objet d'une continuité chronologique. De plus, la presque égalité de la valeur ajoutée avant et après reclassification des établissements pour la période de référence n'est pas un critère suffisant car la valeur ajoutée des établissements reclassifiés à cette industrie peut être importante au point

added changed only marginally. As a result a second criterion was employed to define continuity. The value added of incoming plus outgoing establishments had to be small relative to total value added before reclassification.

As an example, the men's clothing industry (1970 SIC 243, 1980 SIC 243) is not continuous between the two classifications because of changes in the composition of goods manufactured by this industry. In this case it is necessary to go to a higher level of aggregation in order to find a continuous series. Clothing industries excluding hosiery is the lowest level of aggregation that provides a continuous series that includes men's clothing, and is therefore an L level series.

#### (b) **The Business/Non-business Classification**

The treatment of the commercial and non-commercial sectors has changed somewhat and the sectors have been renamed as the business and non-business sectors. The definition of business and non-business sectors has remained conceptually the same; public administration and personal sector industries comprise the non-business sector. What has changed is the manner in which establishments are allocated to the two sectors. Previously, if most of the output of an industry was in the non-commercial sector, then the output of all establishments in the industry was assigned to that sector. Now, establishments are assigned to the business and non-business sectors on an individual basis. As a result, each industry is split between the business and non-business sectors.

A list of industries that constituted the previous non-commercial sector is available in **Gross Domestic Product by Industry** (Catalogue 61-213), covering the period 1971 to 1980, and in **Real Gross Domestic Product by Industry** (Catalogue 61-516) covering 1961 to 1970. Information on industries affected by the new business/non-business split is available in

d'égaliser la valeur ajoutée des établissements qui se retrouvent classifiés dans d'autres industries. Dans ce cas, la structure de l'industrie se trouve à avoir changé de façon significative bien que la valeur ajoutée n'ait varié que légèrement. Pour identifier la continuité, il nous faut donc utiliser un deuxième critère: la somme de la valeur ajoutée des établissements reclassifiés à l'intérieur de l'industrie et celle de ceux reclassifiés à l'extérieur de cette même industrie doit être relativement petite en comparaison de la valeur ajoutée avant reclassification.

Prenons un exemple. Les données pour l'industrie des vêtements pour hommes (CAÉ 1970:243, CTI 1980:243) ne sont pas raccordables entre les deux classifications à cause de modifications à la composition des biens fabriqués par cette industrie. Le raccordement doit se situer ici à un niveau d'agrégation plus élevé afin d'identifier une continuité chronologique. L'industrie de l'habillement sauf les bas représente le niveau d'agrégation le plus détaillé comprenant l'industrie des vêtements pour hommes et fait donc partie des industries au niveau L avec une continuité chronologique.

#### b) **La classification sectorielle des industries**

La classification des industries entre le secteur des entreprises et le secteur non commercial a changé quelque peu. Conceptuellement, la définition des deux secteurs demeure la même. En gros, toutes les industries de l'administration publique et celles des personnes (comme les ménages) demeurent toujours dans le secteur non commercial. En fait, on modifie le processus de désignation des établissements entre les deux secteurs. Auparavant, si la majorité des établissements d'une industrie faisaient partie du secteur non commercial, toute l'industrie était alors classifiée dans ce secteur; tous les établissements sont maintenant classifiés dans leur secteur respectif d'où la présentation des estimations du PIB par secteur pour chaque industrie.

Les utilisateurs peuvent vérifier la liste des industries classifiées par secteur pour les deux décades dans **Produit intérieur brut par industrie** (n° 61-213 au catalogue) et **Produit intérieur réel par industrie, 1961-1971** (n° 61-516 au catalogue). Il existe maintenant une ventilation pour chaque industrie par secteur; pour plus d'informations à ce sujet, les utilisateurs peuvent se

Appendix I of this publication, which describes the System of National Accounts Industry Codes.

### **III. Relationship Between 1961, 1971 and 1981 Based Estimates**

#### **(a) Estimates in 1961, 1971 and 1981 Prices**

For the period 1961 to 1970 the monthly estimates were previously published in 1961 prices, while for 1971 to 1980 they were in 1971 prices. In September of 1986, estimates priced in 1981 dollars were published back to January 1981, compiled according to the new System of National Accounts Industry Codes. In order to make the 1961 and 1971 priced estimates consistent with the data published in September, it was first necessary to recalculate the 1961-1970 and 1971-1980 periods, in 1961 and 1971 prices respectively, consistent with the new classification scheme. These data are available on a cost recovery basis at the L, S, M, and G levels. Price will depend on the volume of data requested.

#### **(b) Linking 1961 and 1971 With 1981 Priced Data**

For purposes of long term analysis it is useful to remove discontinuities due to changes in the base year in which the estimates are priced. This can be accomplished in one of two ways. Estimates for the years 1961 to 1980 can be recalculated at the W level in 1981 prices, and higher levels can be calculated as aggregates of the W level. Unfortunately, this approach will not preserve the growth rates of aggregates as calculated in 1961 and 1971 prices. To see this consider that a constant dollar aggregate is a weighted sum of the physical volumes of the components. The weights are the base year prices for each of the components. Changing base years implies reweighting the sum. If the new weights favour components with relatively high volume growth rates, then the aggregate will exhibit a higher growth rate when priced in the new base year.

référer à l'appendice I portant sur les codes des industries du système de la comptabilité nationale.

### **III. Relations entre les estimations aux prix de 1961, de 1971 et celles aux prix de 1981**

#### **a) Les estimations aux prix de 1961, de 1971 et de 1981**

Les estimations mensuelles aux prix de 1961 ont déjà été publiées pour la période de 1961-1970 et celles aux prix de 1971 l'ont également été pour la période de 1971-1980. En septembre 1986, nous avons publié des estimations aux prix de 1981 pour la période débutant en janvier 1981 compilées selon les nouveaux codes des industries du système de la comptabilité nationale. Afin de rendre compatibles les estimations aux prix de 1961 et celles aux prix de 1971 avec celles publiées en septembre, il fallait recalculer respectivement toutes les estimations de 1961 à 1970 aux prix de 1961 et celles de 1971 à 1980 aux prix de 1971 selon le nouveau système de classification. Les résultats de ces estimations aux prix de 1961 pour 1961-1970 et aux prix de 1971 pour 1971-1980 sont disponibles aux niveaux L, M, S et G sur demande écrite. Le prix à payer sera calculé selon la politique de recouvrement des coûts et en fonction du volume de chaque commande.

#### **b) Le raccordement des données aux prix de 1981**

Pour palier aux problèmes de discontinuité amenés par l'utilisation d'années de référence différentes dans le calcul des estimations en prix constants, on peut recalculer toutes les estimations aux prix de 1981 pour la période de 1961 à 1980. Cette approche cependant nous fait perdre les taux de croissance compilés aux prix de 1961 et de 1971. Considérons un agrégat comme étant la somme pondérée des quantités physiques des composantes; les poids représentent les prix unitaires des composantes durant l'année de base; changer l'année de base implique automatiquement un nouveau calcul de la somme des composantes. Si les nouveaux poids favorisent les composantes qui connaissent un taux de croissance relativement élevé de leurs quantités, alors l'agrégat reflète un taux de croissance plus élevée aux prix de la nouvelle année de base.

An alternative approach was followed in order to preserve growth rates of the aggregates. In general terms the procedure was to multiplicatively scale each base year segment of a series, regardless of its level of aggregation. Specifically, the procedure was as follows:

(i) The 1971-1980 period

These data were previously compiled in 1971 prices. For each industry at the L, M, S. and G levels, the scaling procedure was therefore to multiply each subannual estimate in the segment by the ratio, for 1981, of GDP in 1981 prices divided by GDP in 1971 prices.

(ii) The 1961-1970 period

These data were previously compiled in 1961 prices. To link them to 1981 priced estimates, they were first scaled to 1971 prices, then the procedure outlined in (i) was used to scale them to 1981 prices. Linking data for each industry to 1971 priced estimates was done by multiplying each subannual estimate in the segment by the ratio, for 1971, of GDP in 1971 prices divided by GDP in 1961 prices.

Although this procedure has the advantage of preserving growth rates, it has the disadvantage that prior to 1981 component industries will not add to their associated aggregate. Users who wish to determine industry shares of total output over the period 1961 to 1980 should use annual value added estimates in current dollars, as published by the Input-Output Division (Catalogue 15-510).

All series at the L,M,S and G levels have been linked to 1981 priced estimates using the above procedure. The seasonally adjusted results for the period 1961 to 1980 are presented in Tables 1 and 2 of this publication. The results

Pour préserver les taux de croissance des séries, on multiplie par un facteur chacune des séries compilées selon la période de référence, peu importe son niveau d'agrégation. Voici les étapes de ces calculs:

(i) La période de 1971-1980

Les données sont compilées aux prix de 1971. On obtient un rapport en divisant la valeur du PIB aux prix de 1981 pour 1981 par la valeur du PIB aux prix de 1971 pour cette même année pour chaque industrie ou groupe d'industries aux niveaux L, M, S et G; on multiplie le rapport ainsi calculé par chacune des estimations mensuelles et trimestrielles aux prix de 1971 pour la période de 1971 à 1980, pour ainsi obtenir des séries chronologiques "mécaniquement" réévaluées aux prix de 1981.

(ii) La période de 1961-1970

Après avoir compilé les données aux prix de 1961 pour la période 1961-1970, on calcule deux rapports – celui entre la valeur du PIB aux prix de 1981 pour 1981 et la valeur du PIB aux prix de 1971 pour 1981 et celui entre la valeur du PIB aux prix de 1971 pour 1971 et la valeur du PIB en 1971 aux prix de 1961; les données de 1961 à 1970 pour chaque industrie ou groupe d'industries sont multipliées par ces deux rapports; en fait, cette opération en deux temps permet en premier de ramener aux prix de 1971 les données aux prix de 1961 et finalement de ramener ces résultats aux prix de 1981.

Bien qu'ayant l'avantage de préserver les taux de croissance originaux, cette solution a pour inconvénient d'amener une différence entre la somme des industries composantes et la valeur de leurs agrégats respectifs pour la période avant 1981. Les utilisateurs qui désirent calculer la contribution de certaines industries à l'ensemble de l'économie pour la période de 1961 à 1980 sont priés de consulter la publication "La structure par entrées-sorties de l'économie canadienne" (n° 15-510 au catalogue) de la Division des entrées-sorties afin d'obtenir les valeurs annuelles nominales du PIB par industrie nécessaires à ces calculs sur une base annuelle.

Toutes les estimations par industrie aux niveaux L, M, S et G sont raccordées à celles aux prix de 1981 en utilisant la méthode que nous venons de décrire. Les tableaux 1 et 2 de cette publication présentent les estimations mensuelles

from 1981 are available in **Gross Domestic Product by Industry** (Catalogue 15-001 since January 1987, Catalogue 61-005 prior to this date). These data are also available from 1961 to latest, along with estimates for non-seasonally adjusted series, in CANSIM matrices 4665 to 4668.

#### IV. Sources and Methods for the Monthly estimates

Appendix III briefly describes the data sources and methods used to calculate GDP by industry in 1981 prices, from 1981 to date. Indicators of gross output are used as indicators of value added (net output) for most industries. In the non-business sector employment data is frequently used as a monthly indicator of value added. The list of indicators in Appendix III corresponds closely to the indicators used for the 1971 to 1980 period (available in **Gross Domestic Product by Industry** Catalogue 61-213).

For the period 1961 to 1970, greater reliance was placed on employment data for a large number of manufacturing industries, for financial services industries, and for business services and accomodation and food services industries. Sources and methods used in the preparation of monthly estimates covering this period are available in **Revised Index of Industrial Production 1935-1957** (Catalogue 61-502) and in **Indexes of Real Domestic Product by Industry of Origin 1935-1961** (Catalogue 61-505).

#### V. Qualitative Evaluation of the Monthly Estimates

Appendix IV presents a qualitative evaluation of the monthly estimates. Although necessarily imprecise and somewhat subjective, it is felt that users would benefit from an informed opinion as to the relative quality of the monthly estimates of GDP for each industry. A similar evaluation was published in **Gross Domestic Product by Industry** (Catalogue 61-213) for the period 1971 to 1980. Unfortunately such an evaluation is not available for the period 1961 to 1970.

et trimestrielles désaisonnalisées pour la période de 1961 à 1980. Quant aux données depuis 1981, les utilisateurs peuvent consulter la publication mensuelle **Produit intérieur brut par industrie** (n° 15-001 au catalogue depuis janvier 1987 et 61-005 avant cette date). Ces données, en plus des estimations non désaisonnalisées, sont également disponibles dans CANSIM aux matrices 4665 à 4668 à partir de 1961.

#### IV. Sources et méthodes des estimations mensuelles

L'appendice III décrit brièvement les sources et méthodes du calcul du PIB par industrie pour les données courantes aux prix de 1981. Des indicateurs de produit (production) brut(e) sont utilisés pour la grande majorité des industries alors qu'on retrouve surtout des indicateurs de données du travail pour les industries du secteur non commercial. Cette liste des indicateurs correspond d'assez près à celle publiée dans **Produit intérieur brut par industrie** (n° 61-213 au catalogue) pour la période de 1971 à 1980.

Pour la période de 1961 à 1970, on utilisait davantage les données de l'emploi pour un grand nombre d'industries manufacturières de même que pour les services financiers, les services fournis aux entreprises et l'hébergement. Les utilisateurs peuvent se référer aux listes de sources et méthodes présentées dans **Revised Index of Industrial Production 1935-1957** (n° 61-502 au catalogue) et dans **Indexes of Real Domestic Product by Industry of Origin 1935-1961** (n° 61-505 au catalogue) pour les méthodes utilisées pour la préparation des estimations mensuelles.

#### V. Évaluation qualitative des estimations mensuelles

On trouvera dans l'appendice IV une évaluation qualitative des indicateurs mensuels du PIB par industrie. Il est important de signaler que cette évaluation bien qu'approximative et quelque peu subjective provient l'opinions informées de la qualité générale relative des estimations du PIB réel au coût des facteurs pour chaque industrie. Une évaluation similaire a été publiée dans **Produit intérieur brut par industrie** (n° 61-213 au catalogue) pour la période de 1971 à 1980. Il n'en existe malheureusement pas pour la période de 1961 à 1970.

The following factors were considered in evaluating the estimates:

- Estimates based on indicators of gross output were considered preferable to employment based estimates.
- The greater the proportion of industrial activity measured by an indicator the better. Thus cereal production would not be considered as good an indicator in agriculture as would an industry wide gross output measure.
- The more information an indicator contains about subannual movements the better. A monthly series that results from interpolating an annual series would be inferior to an indicator compiled from a monthly survey.
- The smaller the monthly revisions to the preliminary estimates the better. Here we are referring to revisions occasioned by increased survey response etc., and not to revisions due to adjustment to annual benchmarks.
- The smaller the irregular movement in the annual adjustment factor the better. This adjustment factor is simply the ratio between the annual benchmark and the annual sum of the monthly estimates prior to adjustment to the benchmarks. Systematic trends in this adjustment factor are accounted for in the adjustment technique. Therefore only the irregular component of the adjustment factor is used as a guide to data quality.
- The smaller the irregular movement in the monthly estimates, relative to the trend-cycle movement, the better. It is easier to detect recent short term trends and to study business cycle relationships with series containing relatively small irregular components. This does not mean, however, that a smooth series is necessarily a good series. Output of some industries naturally follows an erratic path, and a good measure of that output would

Les facteurs suivants sont utilisés dans la préparation de cette évaluation qualitative:

- La nature de l'indicateur: ainsi un indicateur calculé à partir de données sur la production brute est préférable à celui basé sur des données de l'emploi.
- La proportion de l'activité économique mesurée par l'information mensuelle: un indicateur mensuel compilé à partir de données couvrant l'ensemble de la production brute agricole est préférable à une mesure couvrant seulement la production céréalière pour refléter la production agricole; en fait, nous faisons l'hypothèse que l'indicateur mensuel reflète sur une base mensuelle toute l'activité économique d'une industrie.
- La capacité de refléter l'activité économique mensuelle de l'industrie: la simple interpolation mathématique des estimations annuelles du PIB représente le pire indicateur mensuel de la production d'une industrie.
- L'amplitude des révisions aux données mensuelles préliminaires: il arrive parfois que des enquêtes mensuelles pour certaines industries fournissent des résultats préliminaires qui font l'objet de révision à un point tel que ceci rend l'analyse économique de ces données plus difficile que pour d'autres industries (on exclut ici les révisions causées par l'ajustement aux points repères annuels).
- Plus la variation irrégulière du facteur d'ajustement au niveau annuel d'une année à l'autre est minime, plus grande est la fiabilité de l'indicateur mensuel à refléter le PIB annuel aux prix constants; on obtient ce facteur en divisant le PIB annuel aux prix constants par la somme annuelle des valeurs provenant de l'indicateur mensuel pour chaque industrie. La technique d'ajustement permet d'identifier et d'extrapoler une tendance soutenue dégagée par le facteur d'ajustement et, par conséquent, seule la composante irrégulière entre en considération dans l'évaluation qualitative.
- Plus petite est la valeur de la composante irrégulière dans les estimations mensuelles par rapport à la composante de la tendance-cycle, plus il est facile d'interpréter les résultats dans un contexte d'analyse des cycles économiques ou de dégager une tendance à court terme plutôt que d'y voir seulement des phénomènes "irréguliers". Bâtir des séries chronologiques mensuelles lisses ne serait pas meilleur: l'activité économique de certaines industries

therefore have a large irregular component. Output measures in the fishing industry for example, change considerably from month-to-month because the catch itself is quite variable. Smoothness is only one dimension considered in assessing quality.

The estimates for each industry have been subjectively assessed, using these criteria, as very good, good, acceptable, or poor.

## VI. Annual Updates of the Monthly Estimates

Each year, in the June issue of **Gross Domestic Product by Industry** (Catalogue 15-001), users will find monthly estimates that incorporate the latest annual benchmarks prepared by Input-Output Division, as well as an updated description of sources and methods, and of the evaluation of the quality of the estimates. In addition to using the latest annual benchmarks, these estimates incorporate new seasonal factors, and, as part of ongoing effort to improve the estimates, modifications to the way projectors of value added are assembled from new data sources.

suit naturellement un cheminement erratique et, par conséquent, une bonne estimation de cette production présenterait une composante irrégulière significative. Il en est ainsi par exemple pour l'industrie de la pêche: les prises de poisson sont saisonnières, mais elles peuvent être aussi bien désastreuses que miraculeuses d'une année à l'autre pour une même "saison" de pêche; il est donc "normal" du point de vue de l'analyse économique de voir de fortes variations mensuelles dites irrégulières dans les estimations désaisonnalisées de la production de la pêche. Le comportement uniforme des séries chronologiques représente seulement un des aspects à considérer dans l'évaluation qualitative des indicateurs mensuels.

À partir de ces facteurs, les estimations mensuelles par industrie font l'objet d'une évaluation qualitative subjective présentée comme étant très bonne, bonne, acceptable ou faible.

## VI. Mise à jour

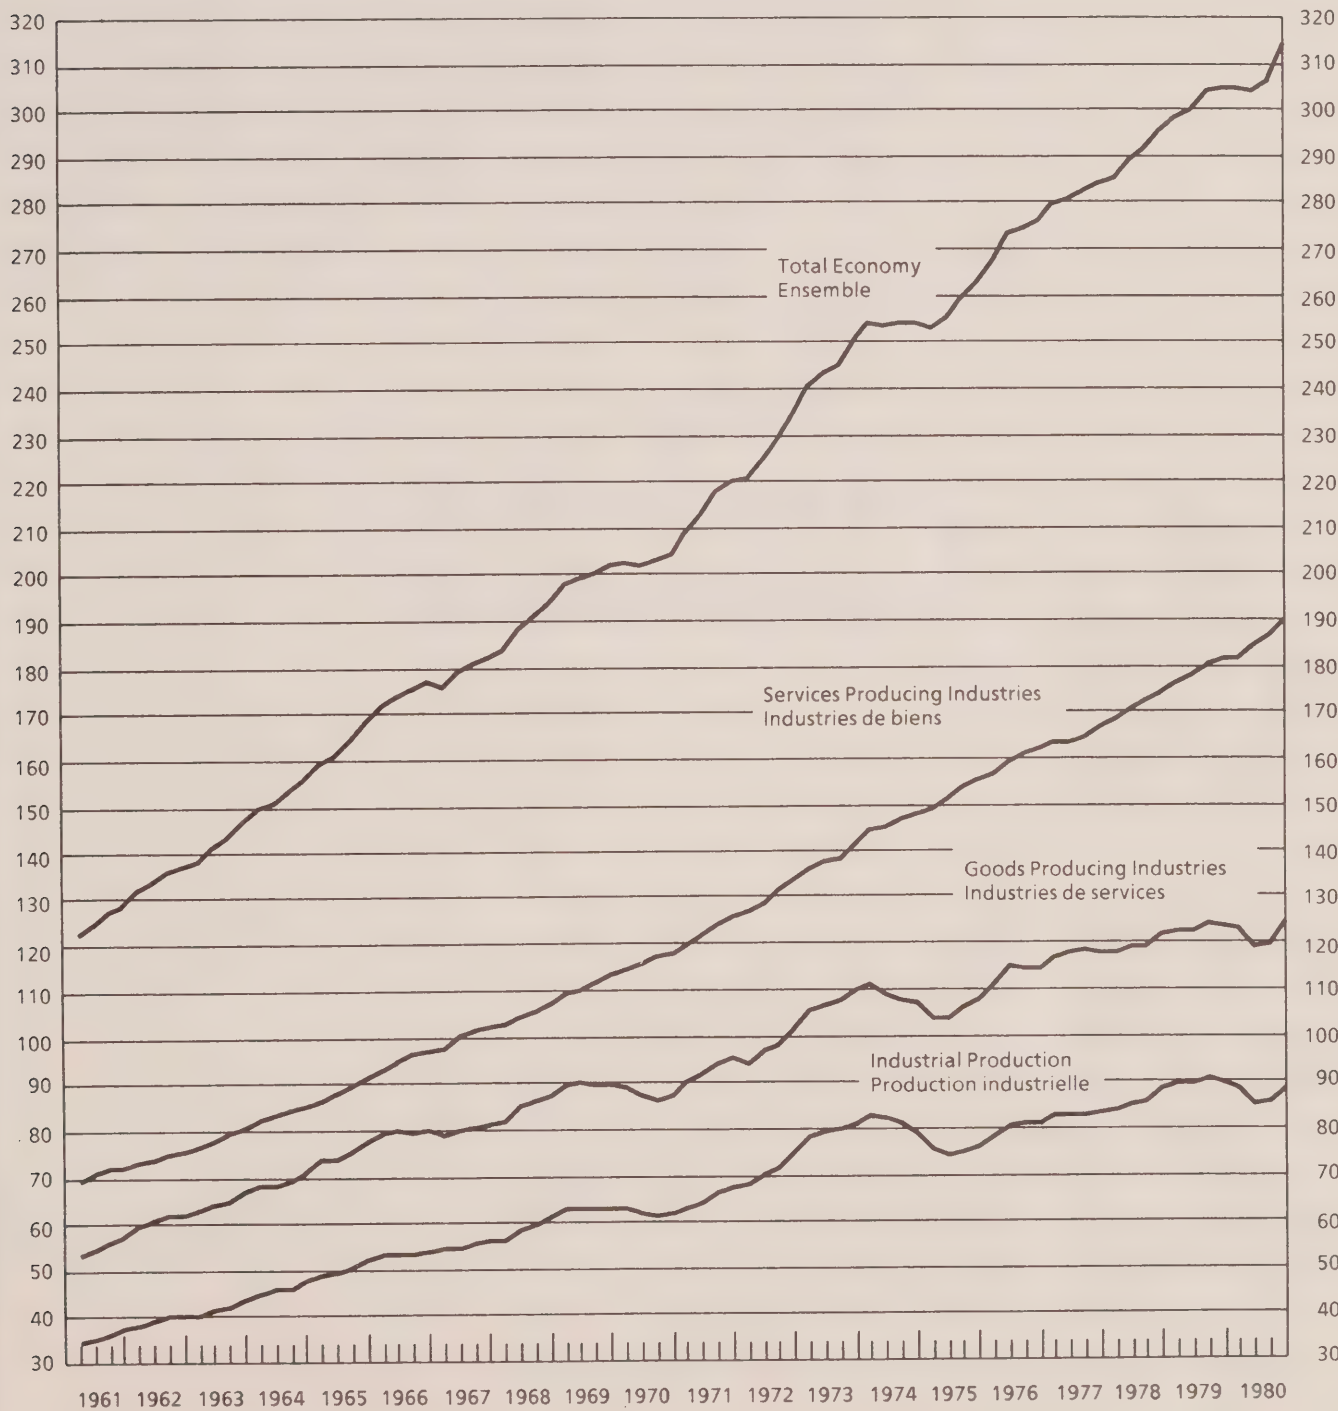

Chaque année, dans la livraison de juin du **Produit intérieur brut par industrie** (n° 15-001 au catalogue), les utilisateurs peuvent y trouver la mise à jour non seulement des données mais aussi des appendices portant sur l'évaluation qualitative et sur les sources et méthodes des indicateurs mensuels par industrie. Cette livraison de la publication contiendra les estimations annuelles du PIB préparées par la Division des entrées-sorties, la révision des ajustements saisonniers et l'incorporation de modifications méthodologiques aux indicateurs mensuels; ces dernières résulteront de la disponibilité de nouvelles données et d'une recherche continue dans l'amélioration de la qualité des estimations mensuelles et plus particulièrement celles où elle est moindre.

# SNA Industry Codes at the Aggregation Levels Small(S), Medium(M), Link(L)

## Codes des industries du SCN aux niveaux d'agrégation S, M et L

No.	Business sector	Secteur entreprises
1	Agricultural & related services ind	Ind. agricoles & de serv. connexes
1.1	Agricultural & related services ind	Ind. agricoles & de serv. connexes
1.1.1	Agricultural & related services ind	Ind. agricoles & de serv. connexes
2	Fishing & trapping industries	Ind. de la pêche et du piégeage
2.2	Fishing & trapping industries	Ind. de la pêche et du piégeage
2.2.2	Fishing & trapping industries	Ind. de la pêche et du piégeage
3	Logging & forestry industries	Exploitation forestière
3.3	Logging & forestry industries	Exploitation forestière
3.3.3	Logging & forestry industries	Exploitation forestière
4	Mining, quarrying & oil well ind.	Mines, carrières & puits de pétrole
4.4	Mining industries	Industries des mines
4.4.4	Gold mines	Mines d'or
4.4.5	Other metal mines	Autres mines de métaux
4.4.6	Iron mines	Mines de fer
4.4.7	Asbestos mines	Mines d'amiante
4.4.8	Non-metal mines ex coal & asbestos	Mines non métal. ex charbon amiante
4.4.9	Salt mines	Mines de sel
4.4.10	Coal mines	Mines de charbon
4.5	Crude petroleum & natural gas	Pétrole brut & gaz naturel
4.5.11	Crude petroleum & natural gas	Pétrole brut & gaz naturel
4.6	Quarry & sand pit industries	Carrières & sablières
4.6.12	Quarry & sand pit industries	Carrières & sablières
4.7	Service related to mineral extract.	Industries des services miniers
4.7.13	Service related to mineral extract.	Industries des services miniers
5	Manufacturing industries	Industries manufacturières
5.8	Food industries	Industries des aliments
5.8.14	Meat & meat products (exc. poultry)	Viande sauf volaille
5.8.15	Poultry products industry	Industrie de la volaille
5.8.16	Fish products industry	Transformation du poisson
5.8.17	Fruit and vegetable industries	Industries des fruits & légumes
5.8.18	Dairy products industries	Industries laitières
5.8.19	Feed industry	Industrie des aliments pour animaux
5.8.20	Vegetable oil mills (exc. corn oil)	Huiles végétales (sauf de maïs)
5.8.21	Biscuit industry	Industrie des biscuits
5.8.22	Bread & other bakery products ind.	Pain & autres prod. de boulangerie
5.8.23	Cane & beet sugar industry	Sucre de canne & de betterave
5.8.24	Misc. food products industries	Produits alimentaires divers
5.9	Beverage industries	Industries des boissons
5.9.25	Soft drink industry	Industrie des boissons gazeuses
5.9.26	Distillery products industry	Ind. des produits de distillation
5.9.27	Brewery products industry	Industrie de la bière
5.9.28	Wine industry	Industrie du vin
5.10	Tobacco products industries	Industries du tabac
5.10.29	Tobacco products industries	Industries du tabac
5.11	Rubber products industries	Ind. des produits en caoutchouc
5.11.30	Rubber products industries	Ind. des produits en caoutchouc
5.12	Plastic products industries	Produits en matière plastique
5.12.31	Plastic products industries	Produits en matière plastique
5.13	Leather & allied products ind.	Ind. du cuir & produits connexes
5.13.32	Leather tanneries	Tanneries
5.13.33	Footwear industry	Industrie de la chaussure
5.13.34	Misc. leather & allied prod. ind.	Ind. des produits divers en cuir
5.14	Primary textile & textile prod. ind	Ind. textiles & produits textiles
5.14.35	Man-made fibre yarn & woven cloth	Fibres chimiques & tissus tissés
5.14.36	Wool yarn & woven cloth industry	Filature & tissage de la laine
5.14.37	Broad knitted fabric industry	Ind. des tissus larges à maille
5.14.38	Misc. textile products industries	Ind. des produits textiles divers
5.14.39	Contract textile dyeing & finishing	Teinture & finissage prod. textiles
5.14.40	Carpet, mat & rug industry	Tapis, carpettes & moquettes
5.15	Clothing industries	Industries de l'habillement
5.15.41	Clothing industries exc. hosiery	Ind. de l'habillement sauf bas
5.15.42	Hosiery industry	Industrie des bas & chaussettes
5.16	Wood industries	Industries du bois
5.16.43	Sawmills, planing & shingle mills	Scieries, rabotage & bardeaux
5.16.44	Veneer and plywood industries	Ind. des placages & contreplaqués

**SNA Industry Codes at the Aggregation Levels Small(S), Medium(M), Link(L) – Continued**  
**Codes des industries du SCN aux niveaux d'agrégation S, M et L – suite**

No.	Business sector – Continued	Secteur entreprises – suite
5.16.45	Sash, door & other millwork ind.	Portes, châssis, autres bois ouvrés
5.16.46	Wooden box & coffin industries	Ind. des boîtes & des cercueils
5.16.47	Other wood industries	Autres industries du bois
5.17	Furniture & fixture industries	Meubles & articles d'ameublement
5.17.48	Household furniture industries	Industrie des meubles de maison
5.17.49	Office furniture industries	Industrie des meubles de bureau
5.17.50	Other furniture & fixture ind.	Autres ind. de meubles & articles
5.18	Paper & allied products industries	Ind. du papier & produits connexes
5.18.51	Pulp & paper industries	Industries des pâtes et papier
5.18.52	Asphalt roofing industry	Ind. du papier-toiture asphalte
5.18.53	Paper box & bag industries	Boîtes en carton et sacs en papier
5.18.54	Other converted paper products ind.	Aut. produits en papier transformé
5.19	Printing, publishing & allied ind.	Imprimerie, édition & ind. connexes
5.19.55	Printing & publishing ind.	Imprimerie & édition
5.19.56	Platemaking, typesetting & bindery	Clichage, composition & reliure
5.20	Primary metal industries	Première transformation des métaux
5.20.57	Primary steel industries	Industries sidérurgiques
5.20.58	Steel pipe & tube industry	Ind. des tubes & tuyaux d'acier
5.20.59	Iron foundries	Fonderies de fer
5.20.60	Non-ferrous smelting & refining ind.	Fonte & affinage métaux non ferreux
5.20.61	Aluminum rolling casting, extruding	Laminage & moulage de l'aluminium
5.20.62	Copper rolling casting & extruding	Laminage, moulage, ext. du cuivre
5.20.63	Other metal rolling, casting etc.	Laminage & moulage d'autres métaux
5.21	Fabricated metal product industries	Fabrication des produits en métal
5.21.64	Power boiler & struct. metal ind.	Chaudières & éléments de charpente
5.21.65	Ornamental & arch. metal prod. ind.	Produits d'architecture en métal
5.21.66	Stamped, pressed & coated metals	Emboutissage & matricage des métaux
5.21.67	Wire and wire products industries	Fil métallique & ses produits
5.21.68	Hardware, tool & cutlery industries	Articles de quincaillerie
5.21.69	Heating equipment industry	Industrie du matériel de chauffage
5.21.70	Machine shops industry	Ateliers d'usinage
5.21.71	Other metal fabricating industries	Autres ind. de produits en métal
5.22	Machinery industries	Industries de la machinerie
5.22.72	Agriculture implement industry	Industrie des instruments aratoires
5.22.73	Commercial refrigeration equipment	Équip. commercial de réfrigération
5.22.74	Other machinery & equipment ind.	Autre machinerie & équipement
5.23	Transportation equipment industries	Industries du matériel de transport
5.23.75	Aircraft & aircraft parts industry	Ind. d'aéronefs & pièces d'aéronefs
5.23.76	Motor vehicle industry	Industrie des véhicules automobiles
5.23.77	Truck, bus body & trailer industry	Carrosseries de camions & remorques
5.23.78	Motor vehicle parts & accessories	Pièces & accessoires pour véhicules
5.23.79	Railroad rolling stock industry	Ind. du matériel ferroviaire roulant
5.23.80	Shipbuilding and repair industry	Construction, réparation de navire
5.23.81	Misc. transportation equipment ind.	Ind. diverses du matériel transport
5.24	Electrical & electronic products	Prod. électriques & électroniques
5.24.82	Small electrical appliance industry	Petits appareils électriques
5.24.83	Major appliances (elec & non-elec.)	Gros appareils (électriques ou non)
5.24.84	Record players, radio & tv receiver	Phonographes, récepteurs radio & tv
5.24.85	Electronic equipment industries	Industrie du matériel électronique
5.24.86	Office, store & business machines	Ordinateurs & autre mach. de bureau
5.24.87	Communications, energy wire & cable	Fils & câbles, élect./communication
5.24.88	Battery industry	Industrie des accumulateurs
5.24.89	Other elect. & electronic products	Autres prod. élect. & électroniques
5.25	Non-metallic mineral products ind.	Produits minéraux non métalliques
5.25.90	Clay products industry	Industrie des produits en argile
5.25.91	Cement industry	Industrie du ciment
5.25.92	Concrete products industry	Industries des produits en béton
5.25.93	Ready-mix concrete industry	Industrie du béton préparé
5.25.94	Glass & glass products industries	Verre & articles en verre
5.25.95	Non-metallic mineral products nec	Produits minéraux non métal. nca
5.26	Refined petroleum & coal products	Prods raffinés de pétrole & charbon
5.26.96	Refined petroleum & coal products	Prods raffinés de pétrole & charbon
5.27	Chemical & chemical products ind.	Industries chimiques
5.27.97	Industrial chemicals industries nec	Prods chimiques d'usage indust. nca

**SNA Industry Codes at the Aggregation Levels Small(S), Medium(M), Link(L) – Continued**  
**Codes des industries du SCN aux niveaux d'agrégation S, M et L – suite**

No.	Business sector – Continued	Secteur entreprises – suite
5.27.98	Plastic & synthetic resin industry	Mat. plastique & résine synthétique
5.27.99	Pharmaceutical & medicine industry	Prod. pharmaceutiques & médicaments
5.27.100	Paint and varnish industry	Industrie des peintures & vernis
5.27.101	Soap & cleaning compounds industry	Savons & composés de nettoyage
5.27.102	Toilet preparations industry	Industrie des produits de toilette
5.27.103	Chemical & chemical products nec	Industries chimiques nca
5.28	Other manufacturing industries	Autres industries manufacturières
5.28.104	Jewellery & precious metal ind.	Bijouterie & orfèvrerie
5.28.105	Sporting goods & toy industries	Ind. des articles de sport & jouets
5.28.106	Sign and display industry	Industrie des enseignes & étalages
5.28.107	Floor tile, linoleum, coated fabric	Dalles, linoleum & tissus enduits
5.28.108	Other manufacturing industries nec	Aut. industries manufacturières n.c.a.
6	Construction industries	Industries de la construction
6.29	Construction industries	Industries de la construction
6.29.109	Repair construction	Réparation (construction)
6.29.110	Residential construction	Construction domiciliaire
6.29.111	Non-residential bldg. construction	Bâtiments autres que domiciliaires
6.29.112	Road, highway & airstrip const.	Const. routes & pistes d'atter.
6.29.113	Gas & oil facility construction	Const. inst. gazif. & pétrolif.
6.29.114	Dams & irrigation projects	Barrages & projets d'irrigation
6.29.115	Railway & telephone telegraph const	Const. ch. de fer, télégr. téléphone
6.29.116	Other engineering construction	Autres travaux de génie
6.29.117	Construction, other activities	Construction, autres activités
7	Transportation & storage industries	Ind. du transport et entreposage
7.30	Transportation industries	Industries du transport
7.30.118	Air transport & services incidental	Transp. aérien & services relatifs
7.30.119	Railway transport & rel. services	Transp. ferroviaire & services rel.
7.30.120	Water transport & rel. services	Transport par eau & services rel.
7.30.121	Truck transport industries	Industries du camionnage
7.30.122	Urban transit system industry	Ind. du transport en commun urbain
7.30.123	Interurban & rural transit systems	Transp. en commun interurbain/rural
7.30.124	Taxicab industry	Industrie du taxi
7.30.125	Other transport & serv. to transp.	Aut. ind. & serv. rel. aux transp.
7.30.126	Highway & bridge maintenance ind.	Entretien des routes, rues & ponts
7.31	Pipeline transport industries	Ind. du transport par pipelines
7.31.127	Pipeline transport industries	Ind. du transport par pipelines
7.32	Storage & warehousing industries	Ind. d'entreposage & d'emmagasinage
7.32.128	Storage and warehousing industries	Ind. d'entreposage & d'emmagasinage
8	Communication industries	Industries des communications
8.33	Communication industries	Industries des communications
8.33.129	Telecommunication broadcasting ind.	Ind. de la diffusion des télécom.
8.33.130	Telecommunication carriers & other	Télécommunications transmission/aut.
8.33.131	Postal service industry	Industrie des services postaux
9	Other utility industries	Aut. industries de services publics
9.34	Other utility industries	Aut. industries de services publics
9.34.132	Electric power systems industry	Industrie de l'énergie électrique
9.34.133	Gas distribution systems industry	Industrie de la distribution de gaz
9.34.134	Other utility industries nec	Autres ind. de services publics nca
10	Wholesale trade industries	Industries du commerce de gros
10.35	Wholesale trade industries	Industries du commerce de gros
10.35.135	Wholesale trade industries	Industries du commerce de gros
11	Retail trade industries	Industries du commerce de détail
11.36	Retail trade industries	Industries du commerce de détail
11.36.136	Retail trade industries	Industries du commerce de détail
12	Finance insurance & real est. ind.	Finances, ass. & aff. immobilières
12.37	Finance & real estate industries	Ind. financières et immobilières
12.37.137	Banks, credit union & oth. dep inst	Banques, caisses d'épargne aut. inst.
12.37.138	Trust, other finance & real estate	Soc. fiducie aut. agents fin. immob.
12.38	Insurance industries	Industries des assurances
12.38.139	Insurance industries	Industries des assurances
12.39	Govt. royalties on nat. resources	Redevances gouv. sur ressources nat
12.39.140	Govt. royalties on nat. resources	Redevances gouv. sur ressources nat
12.40	Owner occupied dwellings	Immeubles occupés par propriétaire

## SNA Industry Codes at the Aggregation Levels Small(S), Medium(M), Link(L) – Continued

## Codes des industries du SCN aux niveaux d'agrégation S, M et L – suite

No.	Business sector – Concluded	Secteur entreprises – fin
12.40.141	Owner occupied dwellings	Immeubles occupés par propriétaire
13	Community, business, person. serv.	Serv. socio-cult. commer. & pers.
13.41	Business service industries	Ind. des services aux entreprises
13.41.142	Other business service industries	Aut. ind. des serv. aux entreprises
13.41.143	Professional business services	Serv. professionnels aux entrepris.
13.41.144	Advertising services	Services de publicité
13.42	Educational service industries	Ind. des services d'enseignement
13.42.145	Educational service industries	Ind. des services d'enseignement
13.43	Health services industry	Ind. des services de soins de santé
13.43.146	Hospitals	Hôpitaux
13.43.147	Other health services	Aut. ind. des serv. de soins de santé
13.44	Accommodation & food service ind.	Hébergement & restauration
13.44.148	Accommodation & food service ind.	Hébergement & restauration
13.45	Amusement & recreational services	Serv. de divertissements et loisirs
13.45.149	Motion picture & video industries	Ind. du cinéma & de l'audiovisuel
13.45.150	Other amusement & recreational serv	Autre serv. de divert. & de loisir
13.46	Personal & household service ind.	Ind. des serv. personnels & domest.
13.46.151	Laundries & cleaners	Blanchissage et nettoyage à sec
13.46.152	Other personal services	Autres services personnels
13.47	Other service industries	Autres industries des services
13.47.153	Photographers	Photographes
13.47.154	Misc. service industries	Industries des services divers
<b>Non-business sector</b>		<b>Secteur non commercial</b>
17	Mining industries	Industries des mines
17.51	Mining industries	Industries des mines
17.51.162	Mining industries	Industries des mines
18	Manufacturing industries	Industries manufacturières
18.52	Manufacturing industries	Industries manufacturières
18.52.163	Manufacturing industries	Industries manufacturières
19	Forestry services industry	Industrie des services forestiers
19.53	Forestry services industry	Industrie des services forestiers
19.53.164	Forestry services industry	Industrie des services forestiers
20	Transportation industries	Industries du transport
20.54	Transportation industries	Industries du transport
20.54.165	Other transport industries	Autres industries du transport
20.54.166	Highway & bridge maintenance ind.	Entretien des routes, rues & ponts
21	Communication industries	Industries des communications
21.55	Radio & television broadcasting ind	Ind. de la radio et télédiffusion
21.55.167	Radio & television broadcasting ind	Ind. de la radio & télédiffusion
22	Water systems industry	Industrie de la distribution d'eau
22.56	Water systems industry	Industrie de la distribution d'eau
22.56.168	Water systems industry	Industrie de la distribution d'eau
23	Insurance & other finance industry	Assurance & aut. agents financiers
23.57	Insurance & other finance industry	Assurance & aut. agents financiers
23.57.169	Insurance & other finance industry	Assurance & aut. agents financiers
24	Government service industries	Ind. des services gouvernementaux
24.59	Government service industries	Ind. des services gouvernementaux
24.59.171	Defence services	Services de défense
24.59.172	Federal government services	Services de l'admin. fédérale
24.59.173	Provincial government services	Services des admin. provinciales
24.59.174	Local government services	Services des admin. locales
25	Community & personal services	Serv. socio-culturels & personnels
25.58	Business service industries	Services aux entreprises
25.58.170	Business service industries	Services aux entreprises
25.60	Educational service industries	Ind. des services d'enseignement
25.60.175	Educational service industries	Ind. des services d'enseignement
25.61	Health & social service industries	Serv. de soins de santé & sociaux
25.61.176	Hospitals	Hôpitaux
25.61.177	Institutional, social services	Établ. de soins & services sociaux
25.61.178	Other health & social services	Aut. services soin de santé/sociaux
25.62	Amusement & other service ind.	Divertissements & autres services
25.62.179	Amusement & other service ind.	Divertissements & autres services
25.63	Personal, household & other serv.	Serv. person., domestiques & autres
25.63.180	Private households	Ménages
25.63.181	Religious organizations	Organisations religieuses
25.63.182	Other-non profit organizations	Aut. organisations sans but lucratif

**SNA Industry Codes at the Aggregation Levels Small(S), Medium(M), Link(L) – Concluded**
**Codes des industries du SCN aux niveaux d'agrégation S, M et L – fin**

No.	Special aggregations	Agrégations spéciales
26	Total economy	Ensemble
27	Business sector industries	Secteur des entreprises
28	Business sector – goods	Secteur des entreprises – biens
29	Business sector – services	Secteur des entreprises – services
30	Non-business sector industries	Secteur non commercial
31	Non-business sector – goods	Secteur non commercial – biens
32	Non-business sector – services	Secteur non commercial – services
33	Goods producing industries	Industries productrices de biens
34	Services producing industries	Industries productrices de services
35	Industrial production	Production industrielle
36	Non-durable manufacturing ind.	Manufacturiers – biens non durables
37	Durable manufacturing industries	Manufacturiers – biens durables

## SNA Industry Codes at the Worksheet Level (W) In Terms of 1980 SIC

## Codes des industries du SCN au niveau de travail (W) selon la CTI de 1980

No.	INDUSTRY TITLE - W	L#	M#	S#	1980 SIC - CTI	NOM DES INDUSTRIES - W	Nº
	Business sector					Secteur des entreprises	
1	Agriculture, livestock	1	1	1	011,012,021	Agriculture, activité des animaux	1
2	Agriculture, fieldcrop	1	1	1	013-017,022,023	Agri., act. des grandes cultures	2
3	Fishing & trapping industries	2	2	2	031-033	Ind. de la pêche et du piégeage	3
4	Logging & forestry industries	3	3	3	0411,0412,0511	Exploitation forestière	4
5	Gold mines	4	4	4	0611	Mines d'or	5
6	Other metal mines	5	4	4	0612-0616,0619	Autres mines de métaux	6
7	Iron mines	6	4	4	0617	Mines de fer	7
8	Asbestos mines	7	4	4	0621	Mines d'amiante	8
9	Potash mines	8	4	4	0624	Mines de potasse	9
10	Salt mines	9	4	4	0625	Mines de sel	10
11	Misc. non-metal mines exc. coal	8	4	4	0622,0623,0629	Div. mines non métal. sauf charbon	11
12	Coal mines	10	4	4	063	Mines de charbon	12
13	Crude petroleum & natural gas	11	5	4	071	Pétrole brut & gaz naturel	13
14	Quarry & sand pit industries	12	6	4	081, 082	Carrières & sablières	14
15	Service related to mineral extract.	13	7	4	091,092	Industries des services miniers	15
16	Meat & meat products (exc. poultry)	14	8	5	1011	Viande sauf volaille	16
17	Poultry products industry	15	8	5	1012	Industrie de la volaille	17
18	Fish products industry	16	8	5	102	Transformation du poisson	18
19	Fruit and vegetable industries	17	8	5	103	Industries des fruits & légumes	19
20	Dairy products industries	18	8	5	104	Industries laitières	20
21	Flour & cereal food industries	24	8	5	1051, 1052	Ind. de la farine et des céréales	21
22	Feed industry	19	8	5	1053	Industrie des aliments pour animaux	22
23	Vegetable oil mills (exc. corn oil)	20	8	5	106	Huiles végétales (sauf de maïs)	23
24	Biscuit industry	21	8	5	1071	Industrie des biscuits	24
25	Bread & other bakery products ind.	22	8	5	1072	Pain & autres prod. de boulangerie	25
26	Cane & beet sugar industry	23	8	5	1081	Sucre de canne & de betterave	26
27	Sugar confectionery industries	24	8	5	1082,1083	Confiseries	27
28	Tea and coffee industry	24	8	5	1091	Industrie du thé & du café	28
29	Misc. food products industries nec	24	8	5	1092-1099	Divers produits alimentaires nca	29
30	Soft drink industry	25	9	5	111	Industrie des boissons gazeuses	30
31	Distillery products industry	26	9	5	112	Ind. des produits de distillation	31
32	Brewery products industry	27	9	5	113	Industrie de la bière	32
33	Wine industry	28	9	5	114	Industrie du vin	33
34	Tobacco products industries	29	10	5	121, 122	Industries du tabac	34
35	Rubber products industries	30	11	5	151-159	Ind. des produits en caoutchouc	35
36	Foamed & expanded plastic products	31	12	5	161	Prod. en plastique moussé & soufflé	36
37	Plastic pipe & pipe fittings ind.	31	12	5	162	Ind. des tuyaux en plastique	37
38	Plastic film & sheeting industry	31	12	5	163	Pellicules & feuilles plastiques	38
39	Plastic bag industry	31	12	5	1691	Ind. des sacs en matière plastique	39
40	Other plastic products ind. nec	31	12	5	1699	Autres prod. matière plastique nca	40
41	Leather tanneries	32	13	5	1711	Tanneries	41
42	Footwear industry	33	13	5	1712	Industrie de la chaussure	42
43	Misc. leather & allied prod. ind.	34	13	5	1713,1719	Ind. des produits divers en cuir	43
44	Man-made fibre & filament yarn ind.	35	14	5	181	Fibres chimiques filés de filaments	44
45	Other spun yarn & woven cloth ind.	35	14	5	1829	Autres filés & tissus tissés	45
46	Wool yarn & woven cloth industry	36	14	5	1821	Filature & tissage de la laine	46
47	Broad knitted fabric industry	37	14	5	183	Ind. des tissus larges à maille	47
48	Misc. textile products industries	38	14	5	191,193,1991 1993-1995,1999	Ind. des produits textiles divers	48
49	Contract textile dyeing & finishing	39	14	5	1992	Teinture & finissage prod. textiles	49
50	Carpet, mat & rug industry	40	14	5	192	Tapis, carpettes & moquettes	50
51	Men's and boy's clothing industries	41	15	5	243	Vêtements pour hommes & garçons	51
52	Women's clothing industries	41	15	5	244	Industries des vêtements pour dames	52
53	Children's clothing industry	41	15	5	245	Ind. des vêtements pour enfants	53
54	Misc. clothing & apparel industries	41	15	5	2491-2493,2495-2499	Div. industries de l'habillement	54
55	Hosiery industry	42	15	5	2494	Industrie des bas & chaussettes	55
56	Sawmills, planing & shingle mills	43	16	5	251	Scieries, rabotage & bardeaux	56
57	Veneer and plywood industries	44	16	5	252	Ind. des placages & contreplaqués	57
58	Pre-fab. wooden bldg. & cabinet	45	16	5	2541,2542	Bâtiments préfab. & armoire en bois	58
59	Door, window & other millwork ind.	45	16	5	2543,2549	Portes, fenêtres & bois travaillé	59
60	Wooden box & coffin industries	46	16	5	256,258	Ind. des boîtes & des cercueils	60
61	Particle & wafer board industries	47	16	5	2592,2593	Panneaux de particule et de copeaux	61
62	Misc. wood industries	47	16	5	2591,2599	Diverses industries du bois	62

## APPENDIX IV

### Quality Assessment of Monthly Gross Domestic Product by Industry at Factor Cost in 1981 Prices

This appendix provides an assessment of the quality of the monthly and quarterly estimates of Gross Domestic Product at the most detailed industry working level. While it is not possible to quantify the margin of error in the estimates of Gross Domestic Product it is possible to provide a somewhat subjective indication of the quality. The following rating system is therefore offered by way of an informed opinion of the relative over-all quality of the estimates of Real Gross Domestic Product at Factor Cost for each industry:

- 1 – Very Good
- 2 – Good
- 3 – Acceptable
- 4 – Poor

## APPENDICE IV

### Évaluation qualitative du produit intérieurs brut mensuel par industrie au corêt des facteurs en prix de 1981

La description présente une évaluation qualitative des estimations mensuelles et trimestrielles du produit intérieur brut calculées au niveau d'industrie le plus désagréé possible. Bien qu'étant impossible de quantifier la marge d'erreur des estimations du produit intérieur brut, il est toutefois possible de fournir une indication approximative et quelque peu subjective de la qualité de ces mêmes estimations. Le système d'évaluation qui suit provient par conséquent d'une opinion informée de la qualité générale relative des estimations du produit intérieur brut réel au coût des facteurs pour chaque industrie:

- 1 – Très bon
- 2 – Bon
- 3 – Acceptable
- 4 – Faible
